DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by U. S. Patent No. 5,445,151 to Darrow et al.

3. Regarding Claim 1-7, Darrow teaches a method of determining the position of an object located in the examination area of an MR device, having the steps of generating high-frequency magnetic field in the examination area, which high-frequency magnetic field runs essentially parallel to a main magnetic field that is active at the same time, whereby a component of the high-frequency magnetic field that is perpendicular to the main magnetic field being produced from the high-frequency magnetic field by conversion means fitted on the object, in the vicinity thereof (Abstract and Claim 1), detecting the nuclear resonance signal excited as a result of the perpendicular component of the high-frequency magnetic field, in conjunction with a gradient magnetic field (Abstract and Claim 1), evaluating the nuclear resonance signal and determining the position of the object. (Abstract and Claim 1)

4. Regarding Claim 8-10 Darrow teaches a catheter with planar coils. (Fig. 2)
